

COLAMCO SERVICES

# ASSET TAGGING & BIOS

Asset tagging and BIOS (basic input/output system) allow you to keep track of your company's valuables and IT infrastructure. Leave it to COLAMCO to apply an asset ID to hardware so you can track with ease.

## OUR SERVICES

### Secure Assets

Import a list of assets and locations and begin tracking the location and disposition of valuables.

### Easy Application

We can install BIOS and apply asset tags provided by you, or we can develop tags using our in-house team.

### Custom Reports

Leave it to us to help you track valuable assets through custom reporting based on your needs.

QUICK. EASY.  
**SECURE.**

## WHY CHOOSE COLAMCO?

Utilize COLAMCO's expertise so your valuable assets are identified, tracked, and secure.

COLAMCO's Configuration and Integration team can create or use customer supplied asset tags for any piece of equipment sourced through COLAMCO or other firms.

With our Asset Tagging and Reporting services, we make identifying, tracking, securing, and recovering your computers easier, simpler and more affordable.

## ABOUT US

COLAMCO is a leader in the information technology industry by delivering best in class technology and solutions to the world's leading companies.
